

SERVICE TRAINING

Training goals

You will have a better understanding of the LU-VE equipment.

We consider the training ended only when we are sure you have the right level of know-how

Target group

The training is aimed to all operators involved in the unit operation and maintenance

Duration

1 day

Contents

- Principles of installation best practice
- Fans replacement and set up simulation
- Practical electrical devices learning
- Practical cleaning maintenance
- Recommended Spare Parts and online ordering
- Practical troubleshooting experiences

Additional information

It combines theory and hands-on operational exercises at a training facility or on site.
