

AlfaBlue BC & BN

Air-cooled condensers

General information & application

The AlfaBlue series is a wide range of heavy-duty air cooled condensers for air conditioning and refrigeration applications. AlfaBlue condensers are available for both horizontal and vertical air direction. Available both in single (M) or dual (D) fan row: separate connections in the dual fan row (D) models provide the opportunity for independent operation of both condenser coils. Dedicated serie for R290 (BCP) and R410A (BCH).

Refrigerants	all HFO/HFC (BC) or ammonia (BN)	
Capacities BC*	56 up to 1069 kW	
Capacities BN*	50 up to 960 kW	

*Nominal capacities (T_{air} = 25°C, T_{cond} = 40°C, T_{subcool} < 3K, T_{superheating} = 25K).

Finned coil

An innovative coil design provides excellent heat transfer at minimal refrigerant charge. Depending on the application, condensers are fitted with cross-fin copper (BC) or smooth stainless steel tubing (BN). Available with two Alu-fin types:

Turbo fins	maximized capacity
Industrial power fins (IF)	long lasting performance

Available in different fin thicknesses and fin spacings.

Construction

Frame construction provides high rigidity for protection against vibration and thermal expansion. Casing and frame made of corrosion resistant pre-galvanized sheet steel, epoxy coated white RAL 9002 on both sides. Separated fan sections.

Fan motors

High efficiency AC or EC fan motors, available in different fan diameters (800, 910 & 1000 mm) and noise levels, power supply 400/50/3. Motors with external rotor, protection class IP54 according to DIN 40050. Integrated thermo contacts provide reliable protection against thermal overload.

Options

- Mounting feet for vertical airflow available in 3 heights: 500, 850, 1200 mm
- Sub-cooling circuit (SC)
- Spray water kit (KW)
- Vibration dampers (VD)
- Hinged fan panels (HF)

AlfaBlue condensers

• Upon request fan motor options

- 400V/3ph/60Hz
- 480V/3ph/60Hz (IP54)
- Protection class IP55
- High-temperature motors

• Coil corrosion protection

- Fins epoxy coated (EP)
- Fins seawater resistant (SWR)
- F-coat treatment (FC)
- Copper fins (CU)

• Packing options

- Pallet (P)
- Protection pallet (PP) *for dual fan row models*
- Crate (CR) *for single fan row models*
- Container skid (SK)

Benefits

- Heavy duty design with high corrosion resistance
- Reduced refrigerant charge
- Available with easily cleanable industrial power fins
- Excellent sound characteristics, suitable for residential applications
- Reliable performance, Eurovent certified (only for models included in Eurovent scope)
- Easy installation & maintenance
- Energy efficient: low total cost of ownership
- Two-year product guarantee
- Easy access to additional on-line product information (QR code)

Electrical accessories

- Switch on/off (SW)
- Connection box: for AC fans (CB), for EC fans (CBP), for EC fans including master controller and pressure probe (CBMP)
- Basic switchboard for AC fans (BS)
- Basic switchboard for AC fans and step controller (BSP)
- Basic switchboard for EC fans (ECCB)
- Basic switchboard for EC fans and master controller (ECCBM)
- EC fans full management system (ICM)

Certifications

The Alfa LU-VE quality system is in accordance with ISO 9001. All products are manufactured according to PED rules. Eurovent certified performance for models included in the scope of the programme.

Design pressure

Design pressure 33 bar for BC and BCP, 30 bar for BN and 45 bar for BCH. Each heat exchanger is leak tested with dry air and finally supplied with a nitrogen pre-charge.

Selection

Selection and pricing is to be performed with our Alfa LU-VE air heat exchanger selection software. Selection output includes all relevant technical data and dimensional drawings.
